FIG.12

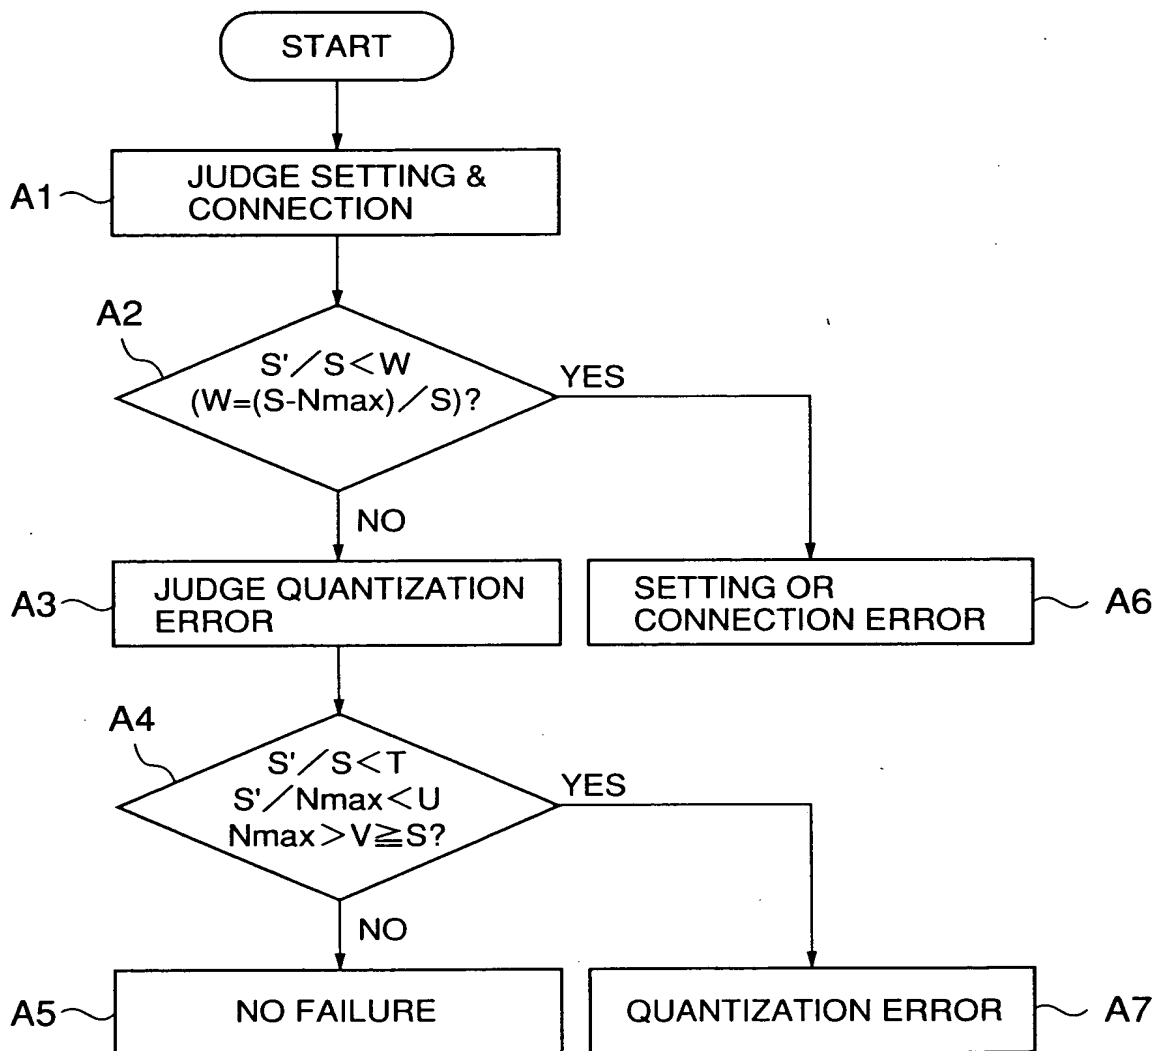

The figure shows a plot of a function $y(t)$ against time t . The function is periodic with a period T . The area under the curve is approximated by a series of vertical rectangular strips, illustrating the numerical integration process. The curve is shown as a dashed line, and the area under it is shaded with vertical lines.

The figure shows a graph of a function $y(t)$ against time t . The function is periodic with period T . The area under the curve is divided into vertical strips, representing the integration of the function over time.

The figure shows a graph of a function $y(t)$ versus time t . The function is periodic with period T . The area under the curve is divided into vertical strips, representing the integration of the function over time.
